

The moment of change is here

CompanionOne has served your community well. But it's being sunset. Now is the time to upgrade your technology and embrace proactive life safety that knows what people need.

Legacy tech

Ensure life safety

Here's the honest truth: you don't need just a system swap, you need to move your community from reactive alerts to proactive, intelligent care. Without starting over with a stranger.

As a current Sentric customer, you have access to an exclusive migration rate on Sentric Ensure®. It's our way of saying thank you and making the right choice an easy one.

Here's why you should sign up and save with your exclusive rate.

Take the smart step forward

Ensure is the smart step forward

Ensure isn't a new version of what you have now; it's a smarter solution and a significant step forward in how you deliver, view, and benefit from life safety.

Powered by Enrich® and the Sentric Care Intelligence platform, Ensure turns everyday activity into insights that help your team anticipate falls, wandering, and clinical changes instead of simply responding to them.

Ensure operates as the life safety layer of the Care Intelligence platform, giving you a 360-degree view of resident risk, staff effectiveness, and care consistency. It's the difference between a system that waits until something has happened and a system that thinks ahead, prevents incidents, and improves outcomes.

Ensure creates:

67%

Decrease in caregiver attrition within the first 90 days

90-plus days

Longer median length of stay—roughly \$15,000 in added revenue per resident

8%

Faster response times, correlated with a 99%-plus resident confidence level

1.4 billion

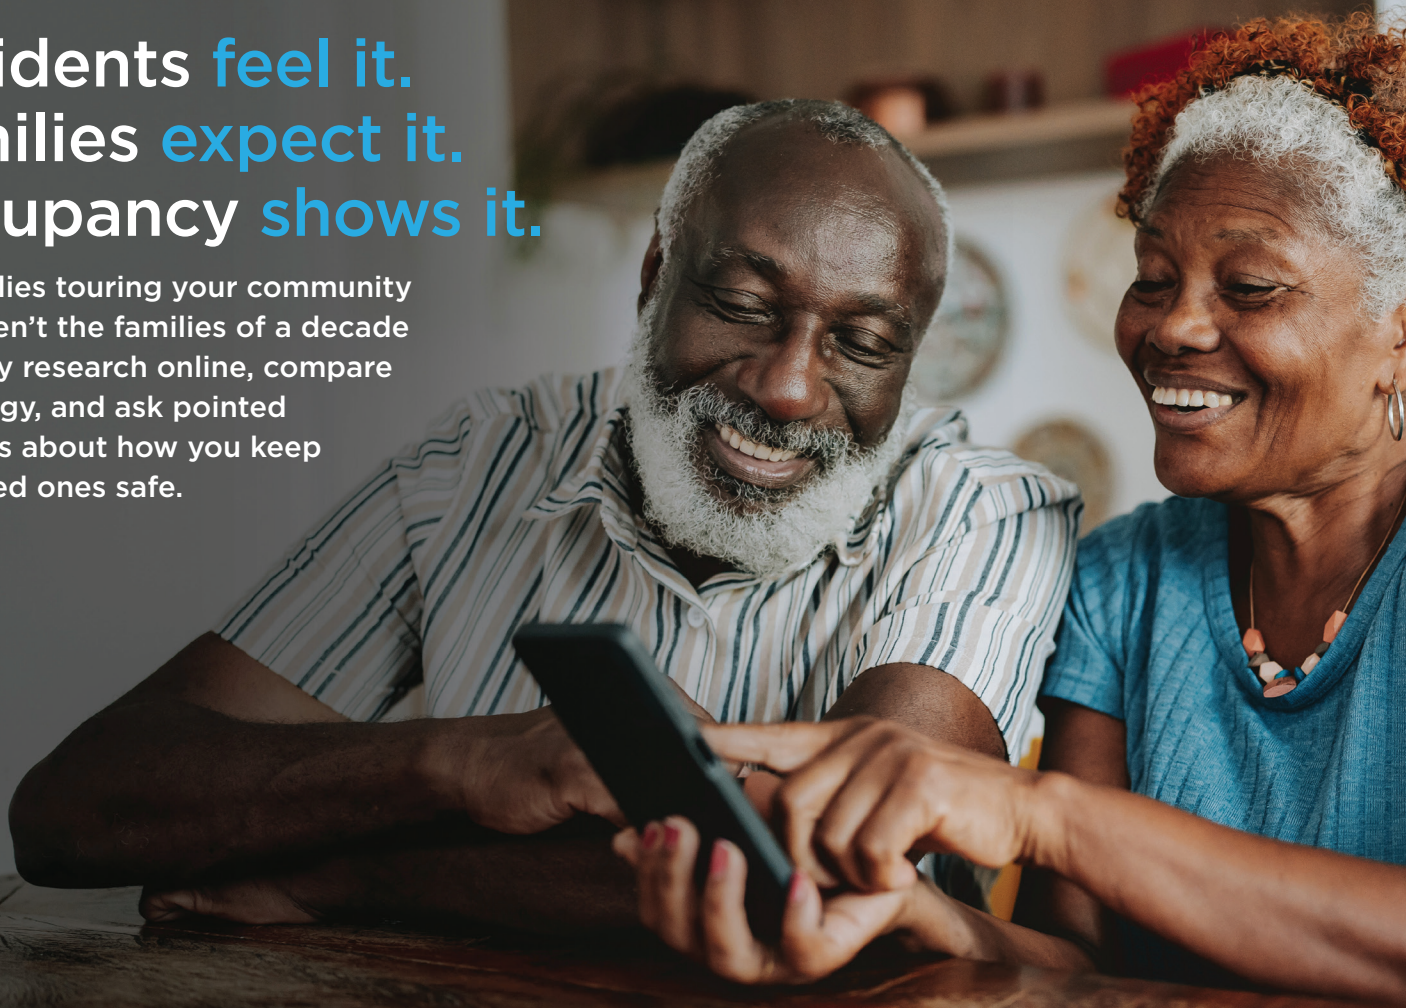

Life safety transmissions analyzed annually across more than 6,000 communities

Discover what's shaping senior living

Residents **feel** it. Families **expect** it. Occupancy **shows** it.

The families touring your community today aren't the families of a decade ago. They research online, compare technology, and ask pointed questions about how you keep their loved ones safe.

Today's families expect:

Technology that **prevents** problems, not just reports them

Clear, transparent **proof** of how care decisions get made

Confidence that staff respond **quickly and consistently**

A community that feels **modern, connected, and secure**

Ensure's proactive, data-driven care shows families you're not just watching for issues—you're working to prevent them.

This is life safety reimagined and trusted by 5,500 communities nationwide.

See why migration makes more sense

Start over or migrate? The answer is clear.

Replacing your system with a competitor means more than new hardware. It means rebuilding what already works. The lower-risk, higher-ROI path is the one you're already on. Migrating your solution keeps your momentum and builds for the future; switching sets you back.

Switching to a competitor

The relationship

Start over with a vendor that doesn't know your community

The data

Lose years of accumulated life safety history

The disruption

Full rip-and-replace, longer timelines, new training

The cost

Full-price competitor pricing

The future

Uncertain roadmap

Migrating to Ensure

✓ Continue with a partner that already knows your building, staff, and history

✓ Build on the data foundation you've already established

✓ Streamlined migration path with a team that's supported you before

✓ Exclusive pricing for current CompanionOne customers

✓ Integrated Care Intelligence, ready for what's next

Ready to experience the difference?

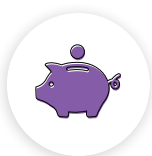

See it for yourself: Request an Ensure demo

In 30 minutes,

we'll walk you through Ensure, Care Intelligence, and a clear migration path built around your community.
